# Tight Taut Immersions Manifolds Chapman Hallcrc

**taut immersions into complete riemannian manifolds** - tight and taut submanifolds msri publications volume 32, 1997 taut immersions into complete riemannian manifolds chuu-lian terng and gudlaugur thorbergsson abstract. the main purpose of this paper is to propose a natural generalization of the notion of a taut immersion into a complete riemannian manifold. **total absolute curvature and tightness of noncompact manifolds** - total absolute curvature and tightness of noncompact manifolds martin van gemmeren ... the related topic of taut immersions of noncompact manifolds is considered in [5]. ... absolute curvature and tightness of noncompact manifolds 2415 is a base for a compact hausdor topology on  $X$  [11], [13]. **tight embeddings of simply connected 4-manifolds** - smooth tight immersions into 3-space exist for all surfaces except for the real projective plane, the klein bottle and the surface with  $\chi = -1$ . the latter is again the most crucial case and was solved by f.haab [7]. ... class of taut 3-manifolds was classified in [17]. in particular it includes an **cylindrically taut immersions** - link.springer - cylindrically taut immersions sheila carter, nadir g. mansour, and alan west ... so "(n-1)-cylindrically taut" means "tight". one would perhaps think at first that ... we show that in certain dimensions cylindrically taut manifolds must be round spheres so that taut manifolds are not always cylindrically taut. however, we do show that ... **durham e-theses immersions into manifolds without ...** - (ii) which deals with tight and taut (convex-minimal) immersions in manifolds without conjugate points. some geometric concepts such as (spherical) two-piece property, h-two-piece property, total **horo-tight immersions of  $S^1$**  - **usp** - that question, namely the horo-tight immersions of a simple closed curve. the concept of horo-tightness was introduced in [4], whose main subjects are tight and taut immersions into hyperbolic space. one may regard tightness, tautness and horo-tightness as generalizations of euclidean tightness. **tightness for smooth and polyhedral immersions of the ...** - tight and taut submanifolds msri publications volume 32, 1997 tightness for smooth and polyhedral immersions of the projective plane with one handle davide p. cervone abstract. the recent discovery that there is a tight polyhedral immersion of the projective plane with one handle, while there is no smooth tight **horo-tight immersions of  $S^1$**  - **eprints.b.hokudai** - question, namely the horo-tight immersions of a simple closed curve. the concept of horo-tightness was introduced in [4], whose main subjects are tight and taut immersions into hyperbolic space. one may regard tightness, tautness and horo-tightness as generalizations of euclidean tightness. **tight embeddings of simply connected 4-manifolds** - tight embeddings of simply connected 4-manifolds wolfgang k uhnel 1 ... tight immersions into 3-space exist for all surfaces except for the real projective plane, the klein bottle and the surface with  $\chi = -1$ . the latter is again the most crucial ... the more restrictive class of taut 3-manifolds was classified in [17].
